

Roof Air Intake

CD-C1

Description

The type C1 roof air intake is typically made of galvanised sheet metal. The bottom part linking to the lead-in is provided with an FLS steel flange.

Upon request, the roof air intake can be supplied with a female or male end, and made of acid-proof or aluminium steel.

The roof air intake is provided with a 12,7 x 12,7 mm large galvanised steel mesh to protect the inlet against dirt.
